

The 2nd MYANMAR - THAILAND Higher Education Institutions Leadership and Networking Programme

17 - 23 February 2019

Royal Thai Embassy in Yangon
and Mawlamyine University

Message from the President

On behalf of Mae Fah Luang University, it gives me great pleasure to officially welcome participants to the second part of the 2nd Myanmar-Thailand Higher Education Institutions Leadership and Networking Programme.

MFU is delighted and deeply honoured to have an opportunity to continue to work with the leaders from Thailand and Myanmar and facilitate the organization of this programme. It is hope that this leadership programme will provide an abundance of opportunities for participants to exchange best practices and leadership experiences in higher education's internationalisation as well as strengthening the relationship between Myanmar and Thai universities.

I wish the second part of the 2nd Myanmar-Thailand Higher Education Institutions Leadership and Networking Programme to be successful in achieving fruitful outcomes and fostering the network of Myanmar-Thailand Higher Education Institutions for sustainable academic collaborations.

Associate Professor Dr. Vanchai Sirichana
President
Mae Fah Luang University

Myanmar-Thailand Higher Education Institutions Leadership and Networking Programme

1. Programme Title

The 2nd Myanmar-Thailand Higher Education Institutions Leadership and Networking Programme

2. Background and Rationale

In response to the needs for human capacity development and to foster academic partnership between Myanmar and Thai higher education institutions, the “Myanmar-Thailand Higher Education Institutions Leadership and Networking Programme” was organized. The programme was divided into two parts; first part was held from 26 - 30 June 2017 at Mae Fah Luang University and the Chiang Mai province; and another part was held at the University of Mandalay and Tuanggyi University from 16 - 20 October 2017. There were 15 executives from both Thailand's and Myanmar's higher education institutions participating in this leadership workshop which included 7 executives from Myanmar universities, 7 executives from Thai universities, and one observer from the Department of Higher Education, Myanmar.

After completing the programme, participants were equipped with knowledge of Myanmar and Thai higher education management systems. The programme also advanced the participants' understanding of working in a cross-cultural environment and provided them an abundance of opportunities to build up the network of Myanmar-Thailand Higher Education Institutions for future collaborative projects.

The successful outcome is evidenced by the recognition of programme's importance from Myanmar government. With recognising the importance of this programme, Myanmar government provided financial support for organising the programme during 15 - 20 October 2017 in Myanmar. It's also encouraged all participating universities to sign the Memorandum of Understanding for the Myanmar-Thailand Higher Education Institution Network.

Furthermore, Myanmar government has set the policy for all universities to establish the International Office at their universities. The International Offices will greatly contribute to Thailand's strategy to build academic cooperation in the future.

For these reasons, the 2nd Myanmar-Thailand Higher Education Institutions Leadership and Networking Programme is held to serve as a venue for higher education administrators to exchange knowledge and good practices in order to develop the administration of higher education especially in areas of **international affairs** and **research**. In addition, this programme will be a channel for communication that supports and fosters the sustainable academic cooperation between Thailand and Myanmar.

3. Objectives

1. To support the establishment of the international Affairs office and its IZN plan.
2. To enable the sustainable academic collaboration among Myanmar and Thai universities.
3. To strengthen Thai and Myanmar universities through academic and research collaboration.
