THE NATION

THE SMILES on the faces of Lisu hill-tribe people in Chiang Rai's Muang district, when mentioning the newly installed water pipeline distribution system from the local mountain, were not just expressions of happiness, but also of great relief from past hardship.

The pipeline system constructed at the Dusit Technical Border Patrol Police School in Tambon Huai Chom Phu has been welcomed as an aid in times of water shortage, a major problem that the residents and students have endured for years.
