

Cosmetic Science

- ❖ Module 1 : Advanced Cosmetic Science for Skin
- ❖ Module 2 : Advanced Cosmetic Science for Hair and Nail
- ❖ Module 3 : Advanced Cosmetic Science for Aromatherapy and Spa
- ❖ Module 4 : Advanced Cosmetic Science for Color and Make-up

The student will certify the Certificate of each module. Those who finish the major compulsory courses and IS will graduate the M.Sc. Program in Cosmetic Science.

Admission Requirements

- ❖ For the B.Sc. degree, applicants must complete the higher secondary school level (Matthayom 6 or equivalent) in a science program.
- ❖ For the M.Sc. program (Plan A), applicants should have graduated or be expecting to graduate from an accredited college or university with a degree in an allied with the GPA of at least 2.5 (on 1 - 4 scale).
- ❖ For those with a lower GPA or a non-related B.Sc. degree but well-trained and experienced in cosmetic industry are recommended to apply for the M.Sc. (Plan B).

School of Cosmetic Science

Career Opportunities

Graduates can expect to have numerous career opportunities. Possible areas of employment are: research and development (R&D), production, and quality control in cosmetic industry, private cosmetic business, and academic career.

About the School of Cosmetic Science

The School of Cosmetic Science is the first academic institute with the established aim to fulfill the need of the large population of cosmetic and beauty professionals in Thailand and the Asia. The school enables practitioners to learn the fundamental science and become acquainted with the latest advances in Cosmetic Science. Students are encouraged to develop advanced skills lead to senior assignments in cosmetic and beauty industry.

The school of Cosmetic Science has active collaborations with several high reparative cosmetic and beauty companies. These includes the agreements on Memorandum of Understanding (MOU) and invited lectures in an attempt to develop the collaborative research and strengthen the supported by leading companies for example; Shiseido Co., Ltd., and Unilever Thai Holdings Ltd.

Study Program

At present, the Bachelor of Science (B.Sc.) and Master of Science (M.Sc.) degrees are offered. Generally, the course structure consists of a comprehensive series of fundamental science and advanced courses in Cosmetic Science and Beauty Technology

Beauty Technology Program

This unique four year course is the first in Thailand to focus on the specialist needs of the beauty industry. The degree has been designed to offer the knowledge background and professional skills in beauty technology.

The course has been developed with the support of the industry and professional bodies in both countries to deliver beauty technology for students aspiring to careers in all aspects of the beauty industry.

Students will experience the combination of systematic and integrated study of a range of science (both pure and applied), therapeutic practices and management. In the fourth year, students have the opportunity to put their knowledge and skills into perspective, acquire 'hands on' experience and develop transferable skills in beauty companies.

B.Sc. (Cosmetic Science)

The degree has been designed to develop the knowledge background, and professional skill in Cosmetic Science. Suitable for those students wishing to pursue their careers in the cosmetic industry, the curriculum covers fundamental understanding and application of cosmetics and related subjects. In addition, the courses will emphasize the marketing and management of cosmetic products to enable students to broaden their skills.

School of Cosmetic Science

Teaching and learning will be by formal lectures, laboratory practicals, group discussions and industrial visits. Course evaluation will be comprised of various assessment methods including assignments, examinations, laboratory reports, seminar presentations, and final year's project report.

M.Sc. (Cosmetic Science)

There are two study plans as follow:

* **Plan A (Type I)**, the graduate student will be given basic knowledge relevant for carrying out activities in the field of formulation, production, control, marketing and technical scientific information related to the cosmetic world. In addition, theoretical and practical lessons will give qualified specific training on cosmetic products, as This plan consists of major compulsory, major elective and thesis courses.

* **Plan A (Type II)** program is offered to those graduates who wish to acquire a deeper scientific knowledge in research and development, as well as formulation of cosmetic products. The evaluation depends exclusively on research performance and the dissertation. Graduates are expected to participate in an academic seminar and conference for their research presentation. This plan is by research only.

* **Plan B (Thai Language)** is launched for those graduates who are well trained and experienced in the cosmetic business and wish to concentrate on activities in the cosmetic business area. This plan consists of major compulsory courses, which are separated into four modules as shown below and independent study (IS);
