

The 3rd International Conference on Agriculture and Agro-Industry

ICAAI2018

Food and Agriculture: Innovation and Sustainability

Mae Fah Luang University, Chiang Rai, Thailand

November 15 - 17, 2018

A Celebration on the Occasion
the 20th Anniversary of
Mae Fah Luang University

CALL FOR PAPERS:

Keynote Speakers:

It is our great pleasure to cordially invite you to The 3rd International Conference on Agriculture and Agro-Industry (ICAAI2018) under the theme of "Food and Agriculture: Innovation and Sustainability". This conference is a quadrennial event, organized by the School of Agro-Industry, Mae Fah Luang University (MFU), Chiang Rai, Thailand. The ICAAI2018 will be held during November 15-17, 2018 as part of the celebrations of MFU's 20th anniversary.

We hope this event will be a forum for scientists, experts, researchers, students and entrepreneurs from all over the world to discuss the latest innovations, specifically in Postharvest technology, Food processing technology, Nutraceutical and functional food as well as Food security and sustainability. To nourish your thought and discussion, we have arranged a series of impressive selection of keynote speakers to address the cutting edge topics in the innovations and sustainability of food and agriculture on a global level.

We encourage all participants to take this opportunity to strengthen their knowledge in the field, share their ideas, connect and collaborate with other researchers from around the world in this extraordinary ICAAI2018 event.

Registration Fee:

Thai delegates	Early Bird	Late Owl
Student	3,500 THB	4,500 THB
Participant	5,500 THB	6,500 THB
Accompanying person	3,000 THB	3,000 THB
Overseas delegates	Early Bird	Late Owl
Student	170 USD	200 USD
Participant	250 USD	300 USD
Accompanying person	150 USD	150 USD

Prof. Dr. Julie A. Lovegrove

University of Reading, United Kingdom
"The importance of fruits and vegetables on cardio-metabolic health"

Prof. Dr. Qingrong Huang

Rutgers University at New Brunswick, USA
"Application of food nanotechnology to engineer novel functional ingredients: Bioavailability and efficacy improvement"
